LPDDR4 Connection

VSC8662 - SGMII Interface

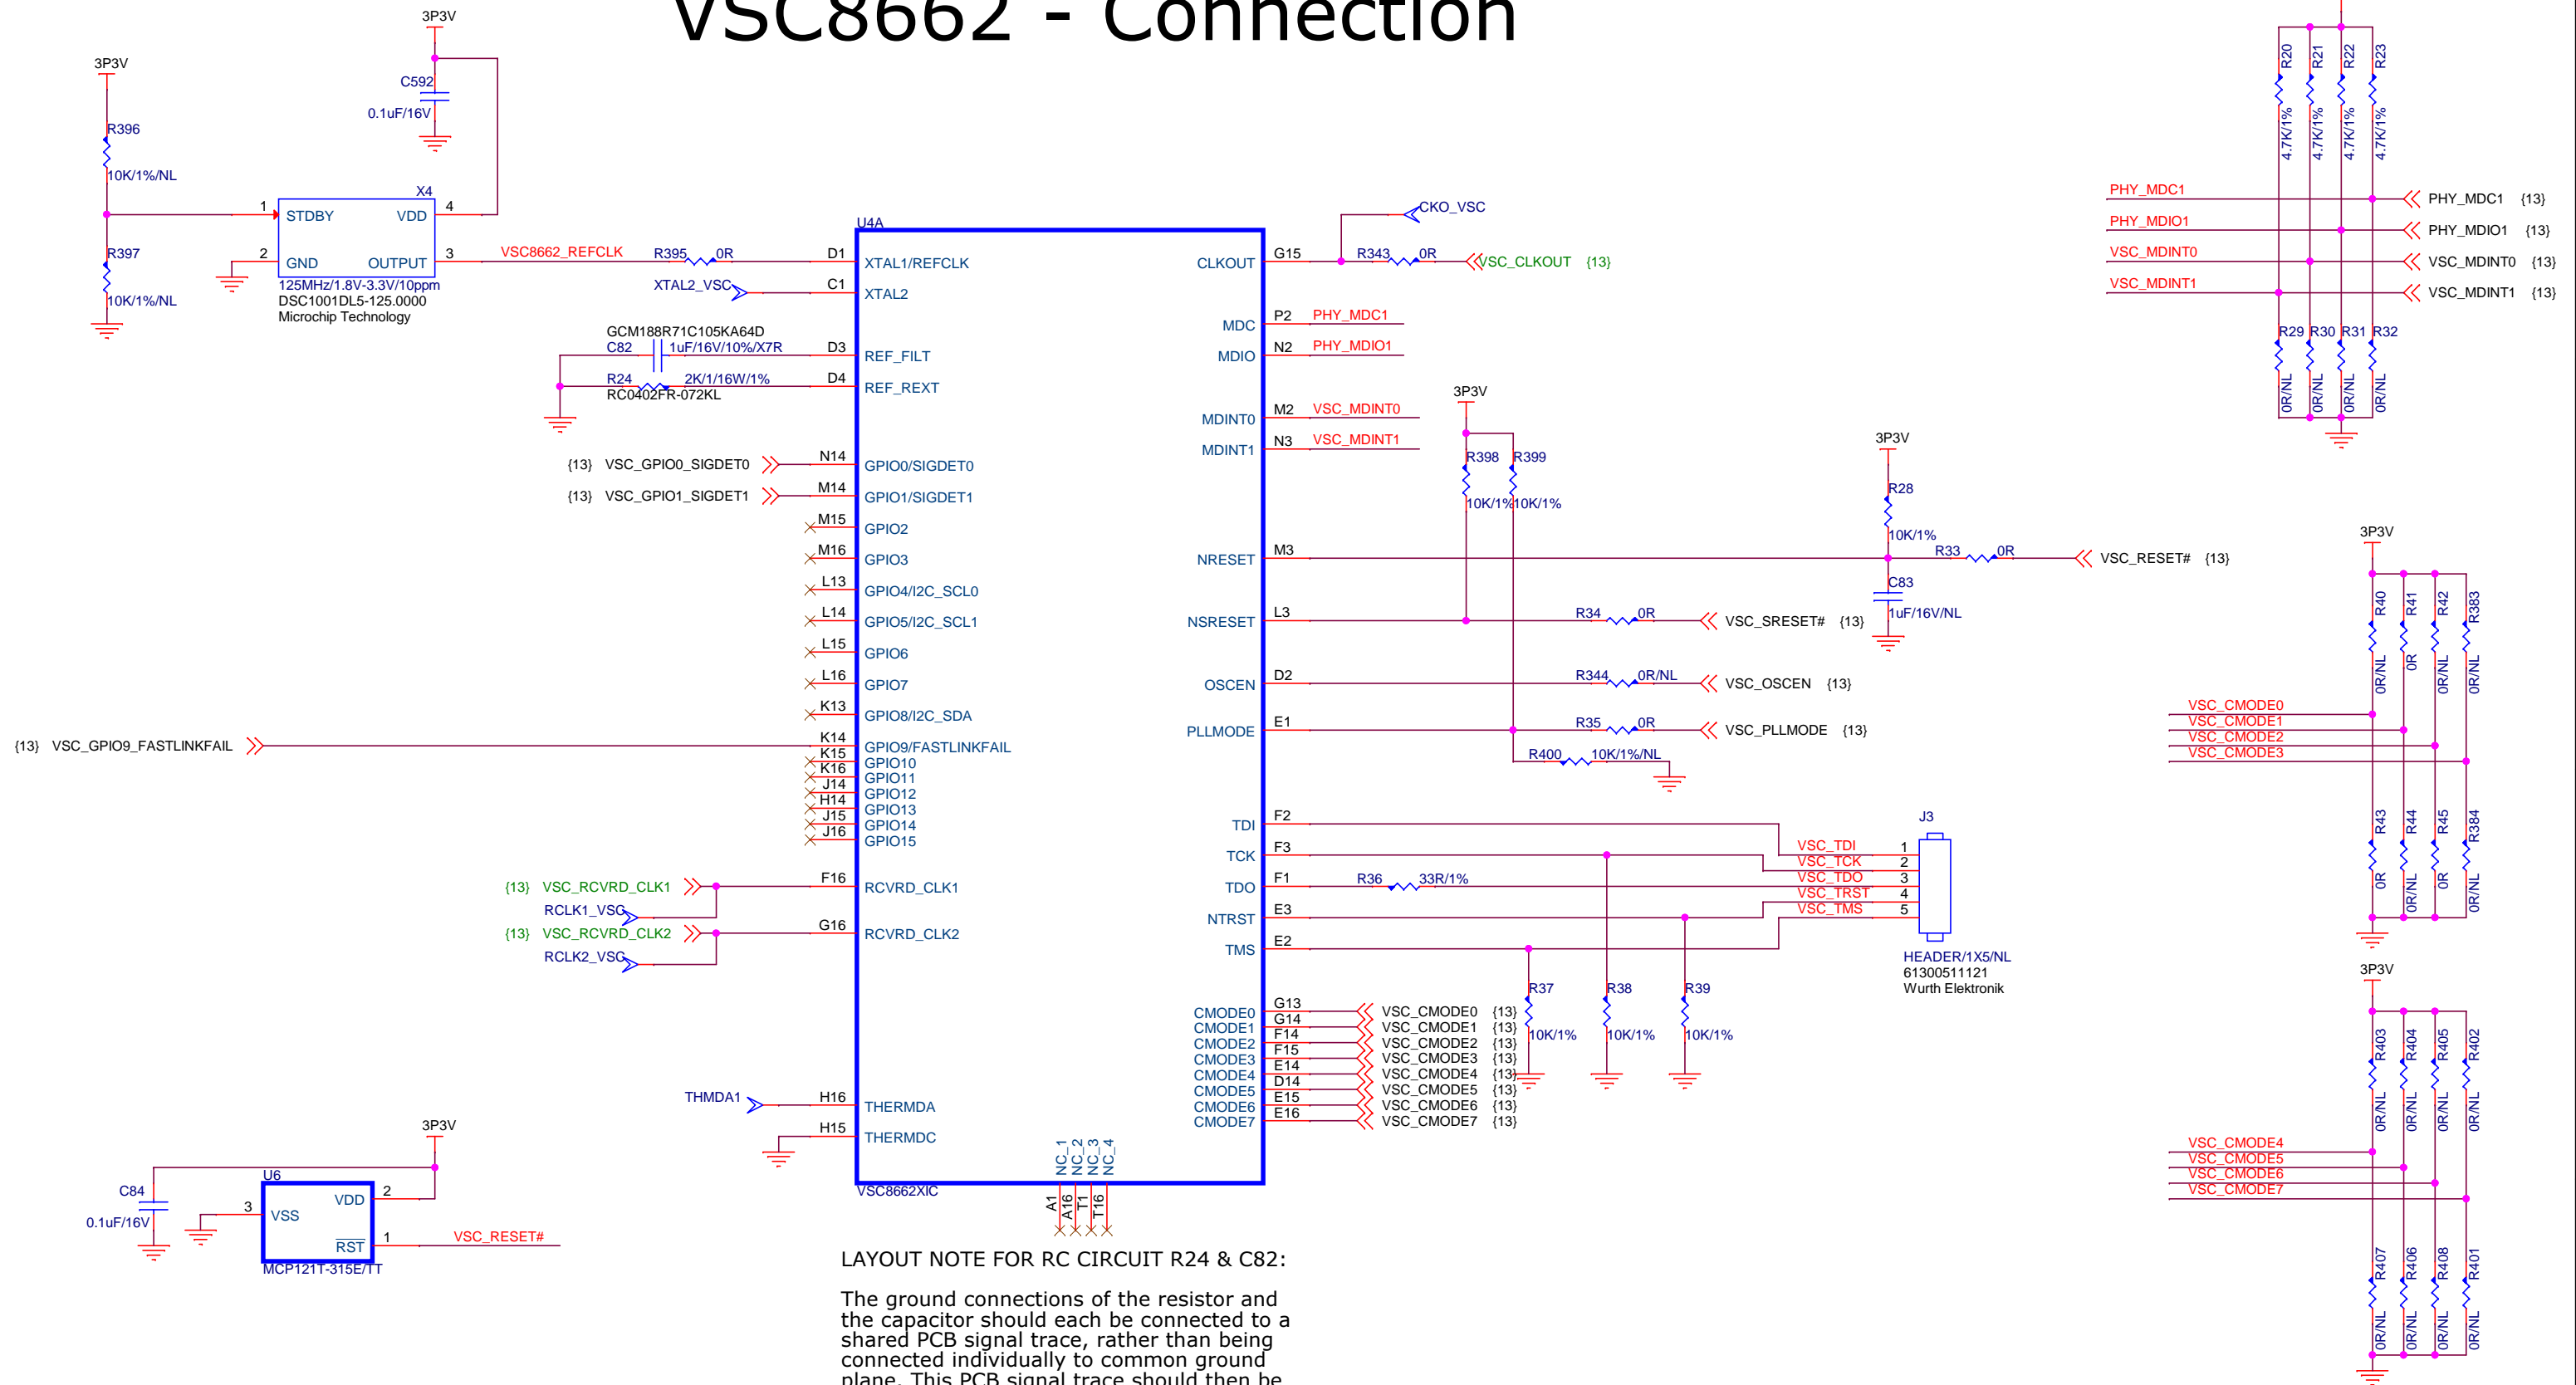

VSC8662XIC is not UNH compliant for all tests

Not recommended for new design. Please use VSC8552 and refer to the below app-notes for migration:
<https://www.microchip.com/wwwAppNotes/AppNotes.aspx?appnote=en950121>
<https://www.microchip.com/wwwappnotes/appnotes.aspx?appnote=en1003060>

VSC8662 - Connection

LAYOUT NOTE FOR RC CIRCUIT R24 & C82:

The ground connections of the resistor and the capacitor should each be connected to a shared PCB signal trace, rather than being connected individually to common ground plane. This PCB signal trace should then be connected to a ground plane at a single point. In addition, the reference capacitor and resistor should be placed as close as possible to the VSC8662

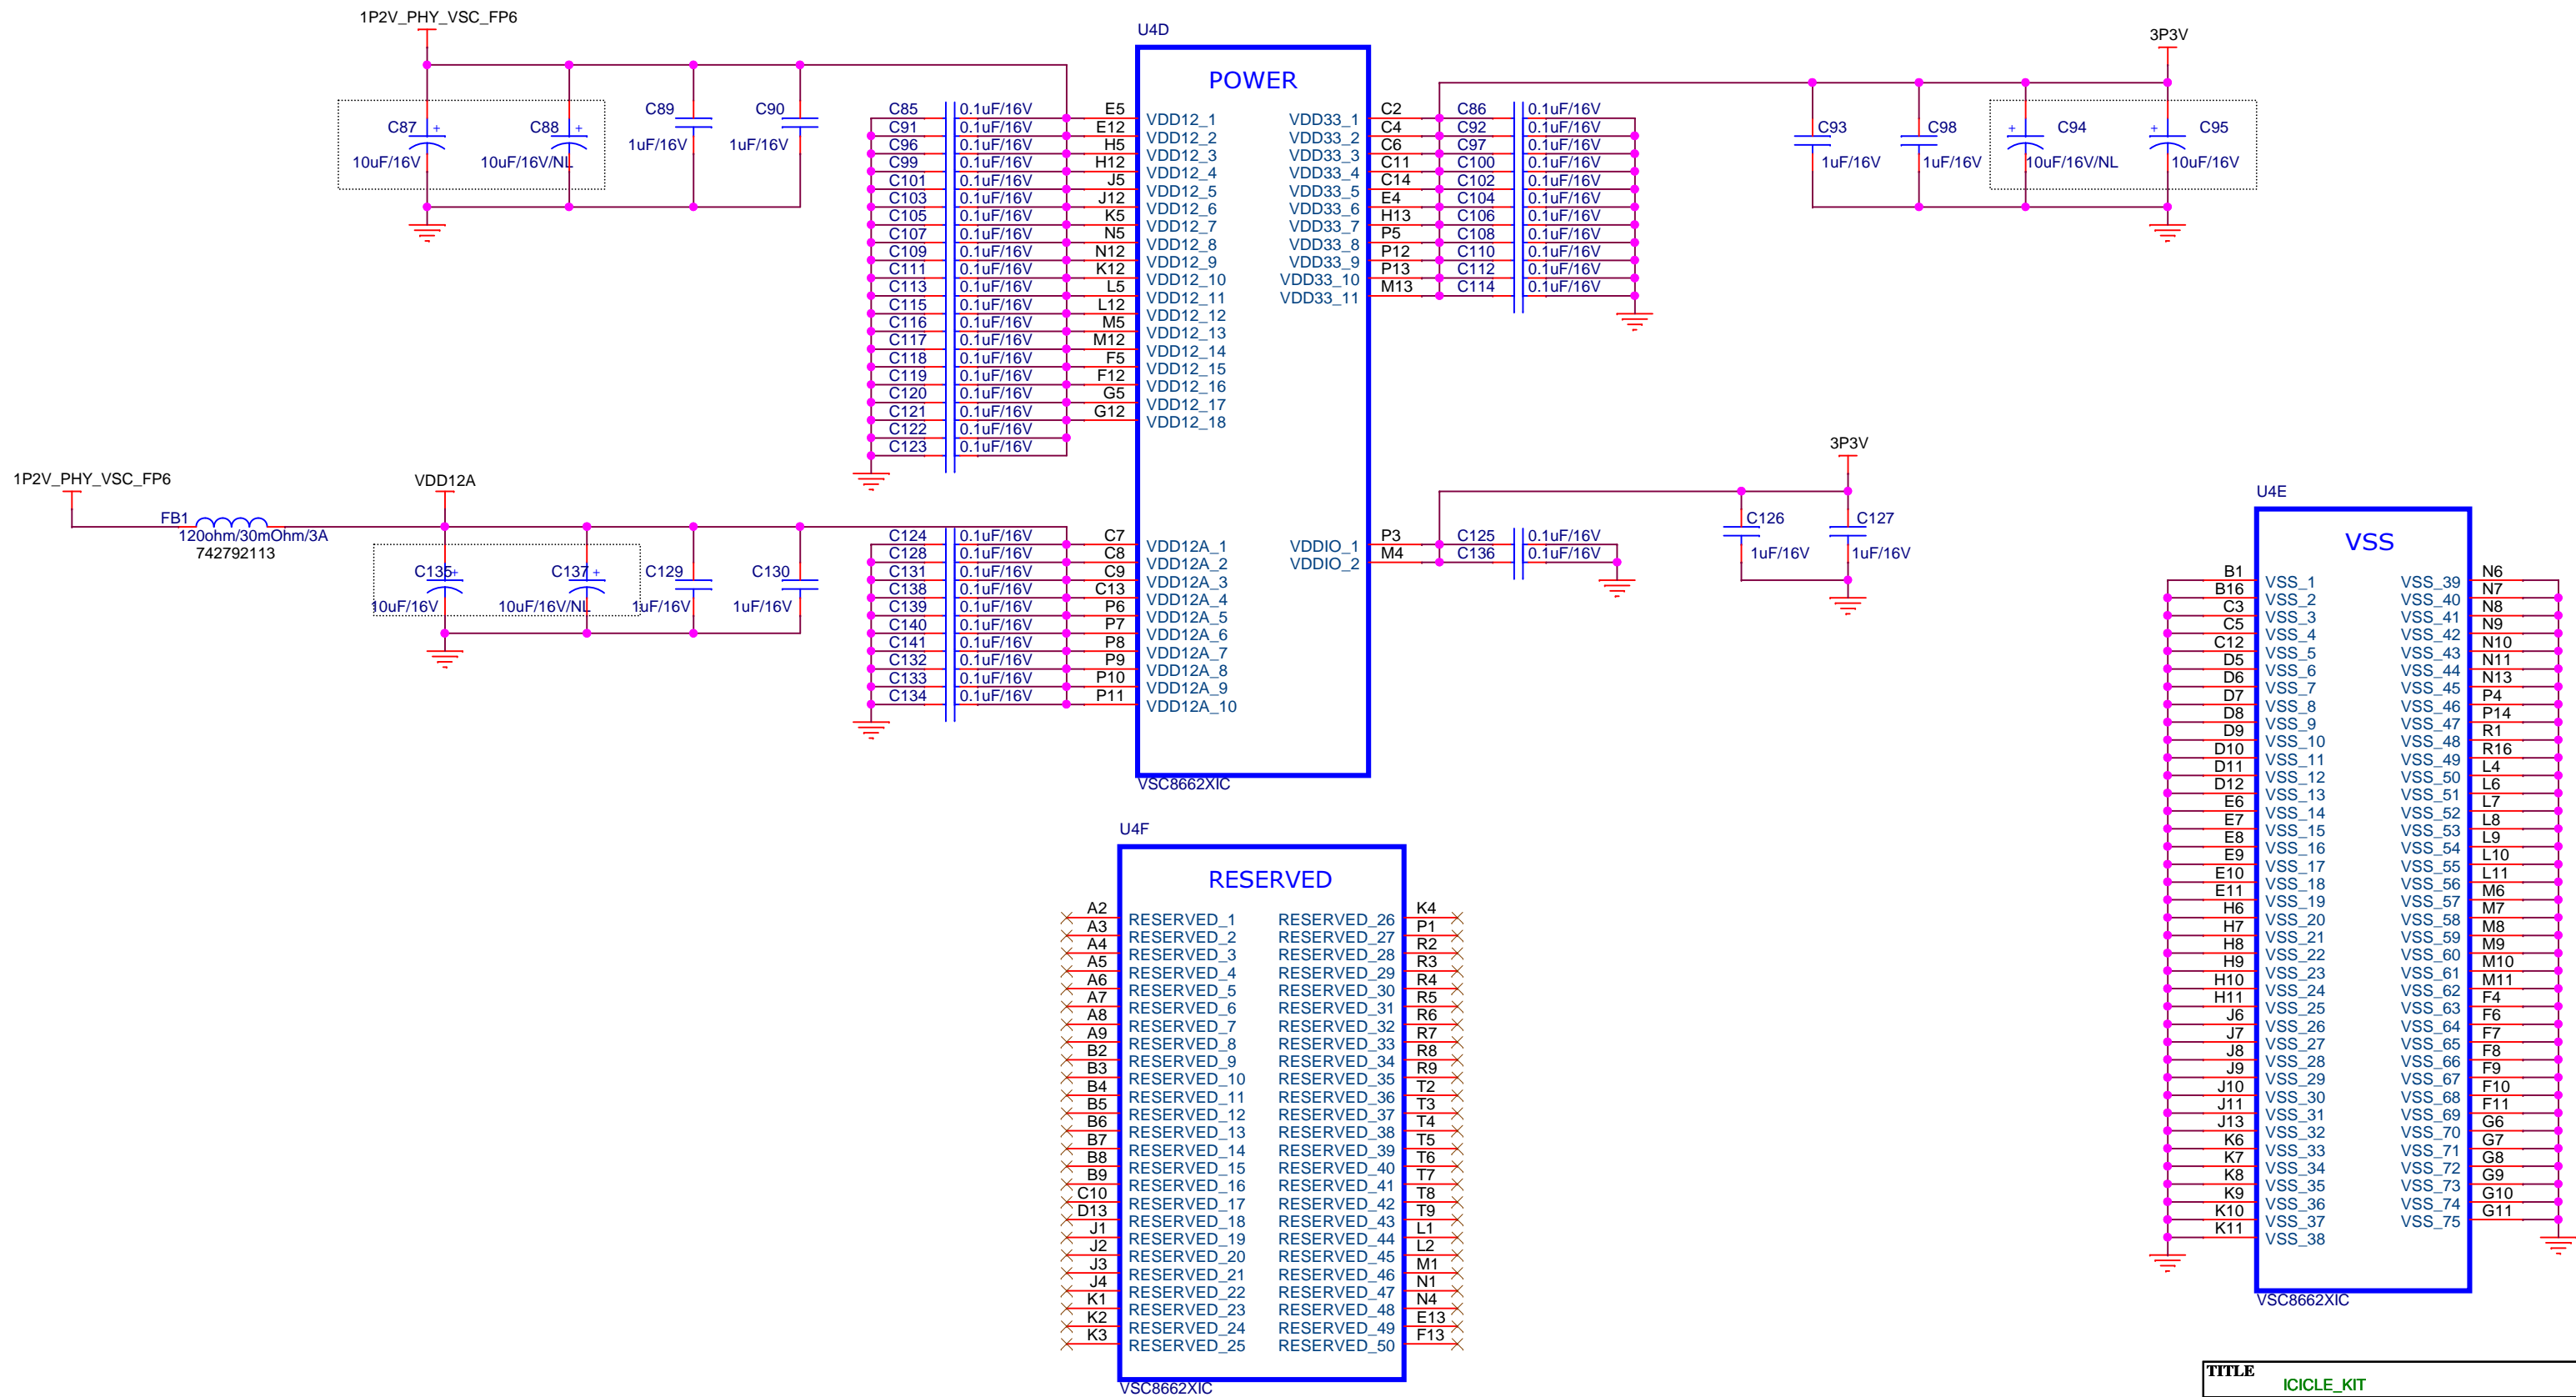

VSC8662XIC is not UNH compliant for all tests

Not recommended for new design. Please use VSC8552 and refer to the below app-notes for migration:
<https://www.microchip.com/wwwAppNotes/AppNotes.aspx?appnote=en950121>
